About Me

I am a Software Engineer professional with experience working as an App Developer and Fullstack/Frontend Engineer. Throughout my career, I have been involved in various web and mobile application development projects, enriching my understanding of designing, building, and optimizing applications for diverse business needs.

I have hands-on experience with a range of technologies and programming languages, including Vue.js, React.js, Next.js, Nuxt.js, Laravel, Spring Boot and OutSystems. My ability to master these technologies allows me to quickly adapt to project requirements and develop applications with optimal performance.

In addition, I have a deep understanding of software development structures and design patterns, including the use of clean, organized code architecture. I believe that well-structured code not only streamlines the development process but also simplifies maintenance and future enhancements.

With a combination of technical experience, strong grasp of software development concepts, and the ability to work effectively both in teams and independently, I am confident in my ability to contribute positively and innovatively to your company.

Skills & Competencies

- JavaScript : Vue.js, jQuery, Nuxt Js, React js, Next Js
